

ZÜRICH VIDEO TAGS

A subjective map of Zurich will be created by its inhabitants - consisting of many personal videos.

A participatory art project for people in Zurich with their mobile devices in public space.

Follow the citizens' traces in Zurich with your mobile device: Find their videos with the ZHVideoTags app. Each video will mark a spot in the city which is meaningful to the author of the video: the video will express his/her relation to this spot.

Free app: **ZHVideoTags**

(iOS + Android)

www.zuerich-video-tags.ch

Fill the ZHVideoTags app with your own content:

Tag Zurich with your personal visions, views, memories.

Express your relation to a certain place in Zurich in a video!

What is the meaning of this place for you? What have you experienced here? Which ideas or imaginations does this place evoke? What are you doing here?

You are kindly invited to create and contribute a video of your personal relation to a certain place in Zurich! Please upload your video at

www.zuerich-video-tags.ch

It will become part of the app and can be watched at its spot in Zurich.

OR: In case you cannot edit a video yourself, upload photographs, drawings, text, sound, and/or video recordings about your selected spot. Out of your material, together we'll produce a video.
